INVISIBLE BEAD EXTENSIONS®

HOME CARE GUIDE

1 Always use professional products.

Use professional, sulfate/paraben-free products. Use a leave in conditioner and treat with a mask once a week when needed. If applying heat, always use a heat protectant to help protect the hair from dryness or discoloration. **My salon recommendation: OWAY professional hair care.**

2 Don't forget a daily serum.

Daily use of an oil or serum helps keep your hair soft and manageable. Avoid tinted oils, which can tarnish blonde extensions. **Choose a lightweight, clear serum or oil.**

3 Follow proper swimming & beach prep.

Rinse hair with tap water first, then liberally apply a leave in conditioner. Leave hair wet/damp and secure it in a bubble-style braid. Avoid sunscreens containing Avobencene, which can tum blonde extension hair pink or peach.

4 Take care after activities that cause sweating.

After the gym, steam rooms, saunas, or other humid/sweaty activities, dry the extensions immediately. Focus on the weft line to help prevent moisture retention and swelling.

5 Be diligent about your nightiime prep ruutine.

Never sleep with wat hair—it can cause severe matting and tangling. Place hair in a loose top hnot or braid. A silk pillowsase can help keep hair manageable and reduce frizz.

6 DO NOT brush the top of the weft.

Avoid brushing directly over the top of the wefts where the stitching is. Pulling on the stitching can lead to matting and shedding and may shorten the iife of your extension hair.

7 Always support the top of the wefts & corners.

Press down on t the wefts and comers while b blow-drying, and styling. ect the health of yo nd extensions. y hiica day.

8 Separate the hair row by row.

Separate the hair into sections by row when brushing, shampooing, and blow-drying. This keeps you gentls on the hair and helps prevent unnecessary pulling, initation, and damage.

9 NEVER pull the hair into a ponytaii in the middle back of your head.

A middle-back ponytail can place unnecessary tension on your extensions. Keep the ponytail low or fully flipped up and high. Pulling hair back into the middle of the head can create tension at the front of the extensions.
